

Reduces Teaching with Intuitive Operation that Feels Like Welding by Hand

Experience Direct Teaching

Direct teach ideal for welding

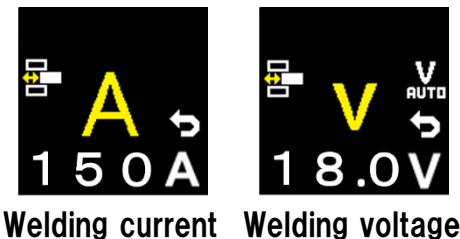

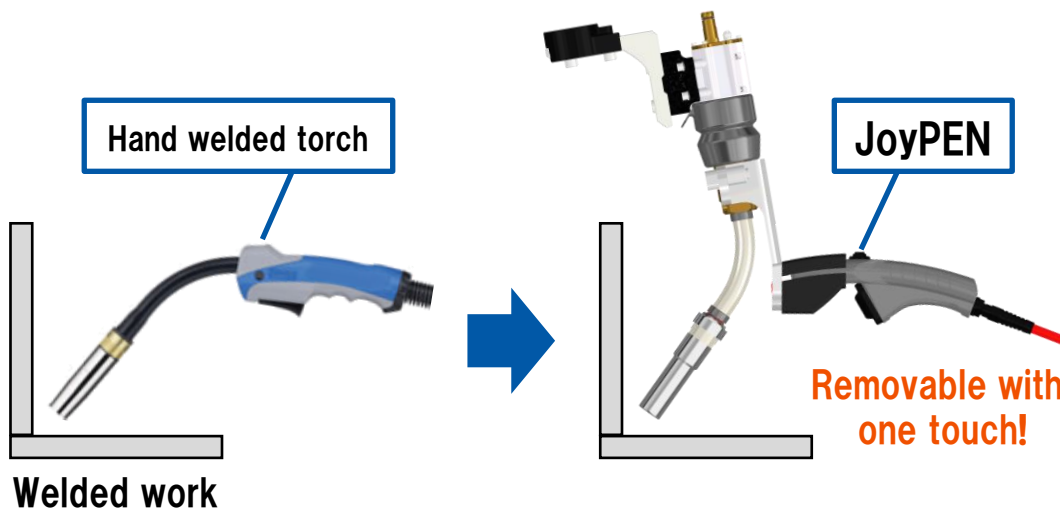

- Easy to move to the welding start point and adjust the welding posture
- Reduce robot program creation time by approximately 35%*

*Comparison with creating a robot program using a teaching pendant

New direct teach combined with JoyPEN

- Adjust the target position and angle with the same feeling as manual welding
- Complete at hand, including welding condition settings
- Easily move to the target position with the wire touch function
- Reduce robot program creation time by approximately 60%*

*Comparison with creating a robot program using a teaching pendant

Direct teaching, which feels like manual welding, can help reduce your robot teaching man-hours.
