

## Cooperative robot best suited for arc welding applications

### Welding Site Issues

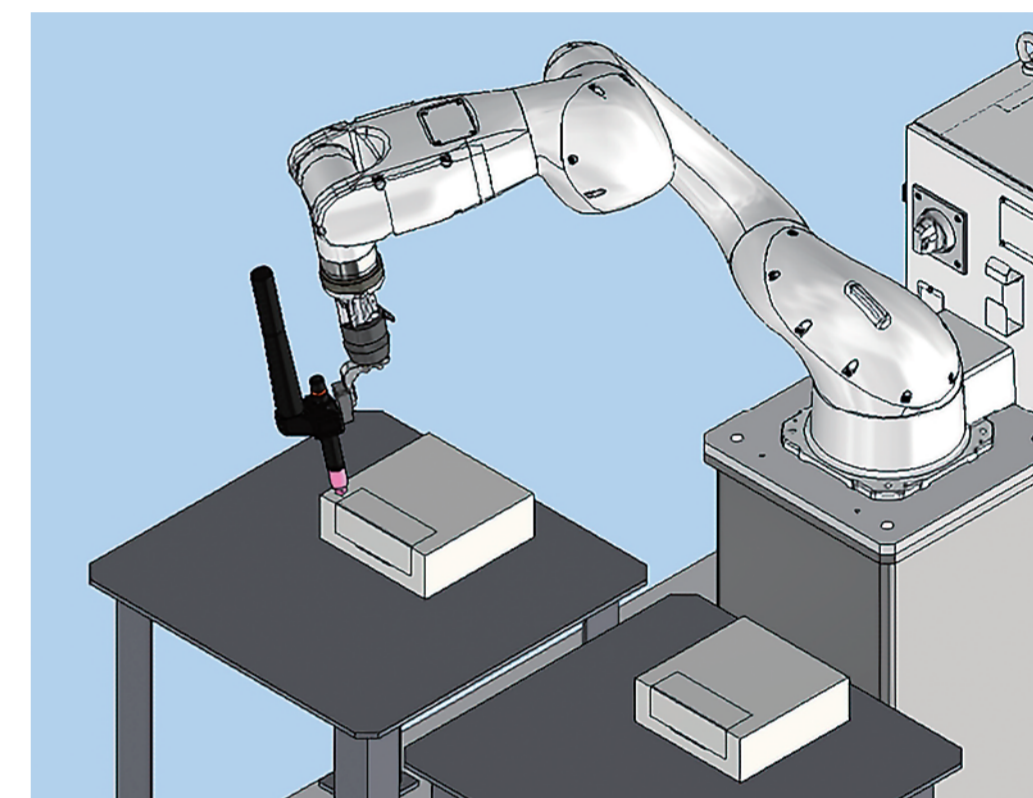

- Quality depends on the skill of the welder.
- Large space is required to install robots / difficult to relocate

### Cooperative robot specialized for welding

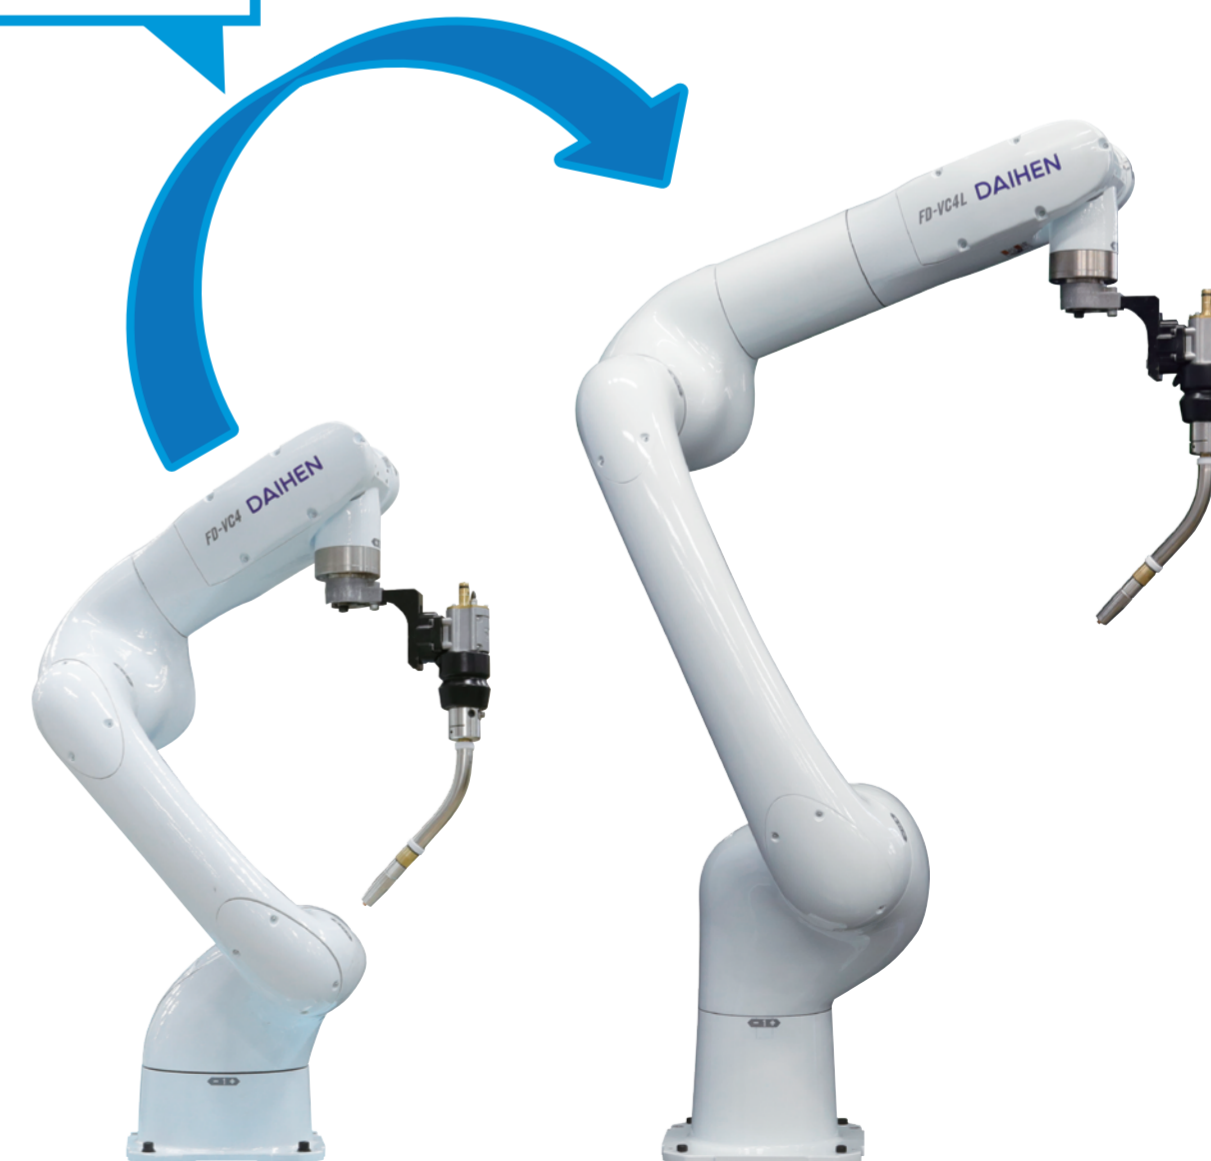

- Highest class welding quality due to high locus accuracy
- Noise resistance applicable to TIG welding
- A wide variety of welding applications available from Daihen

### Applicable to various layouts

- No need for safety fences, contributing to space saving
- Compact arm design for easy relocation
- Expanded scope of application with the addition of a long type
