![DAIHEN]
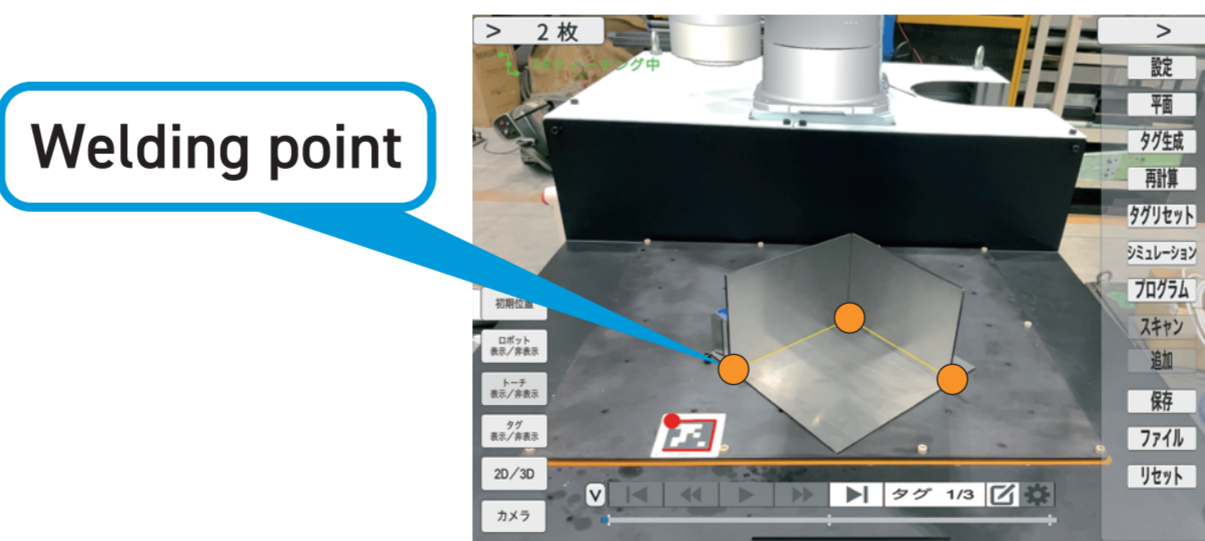

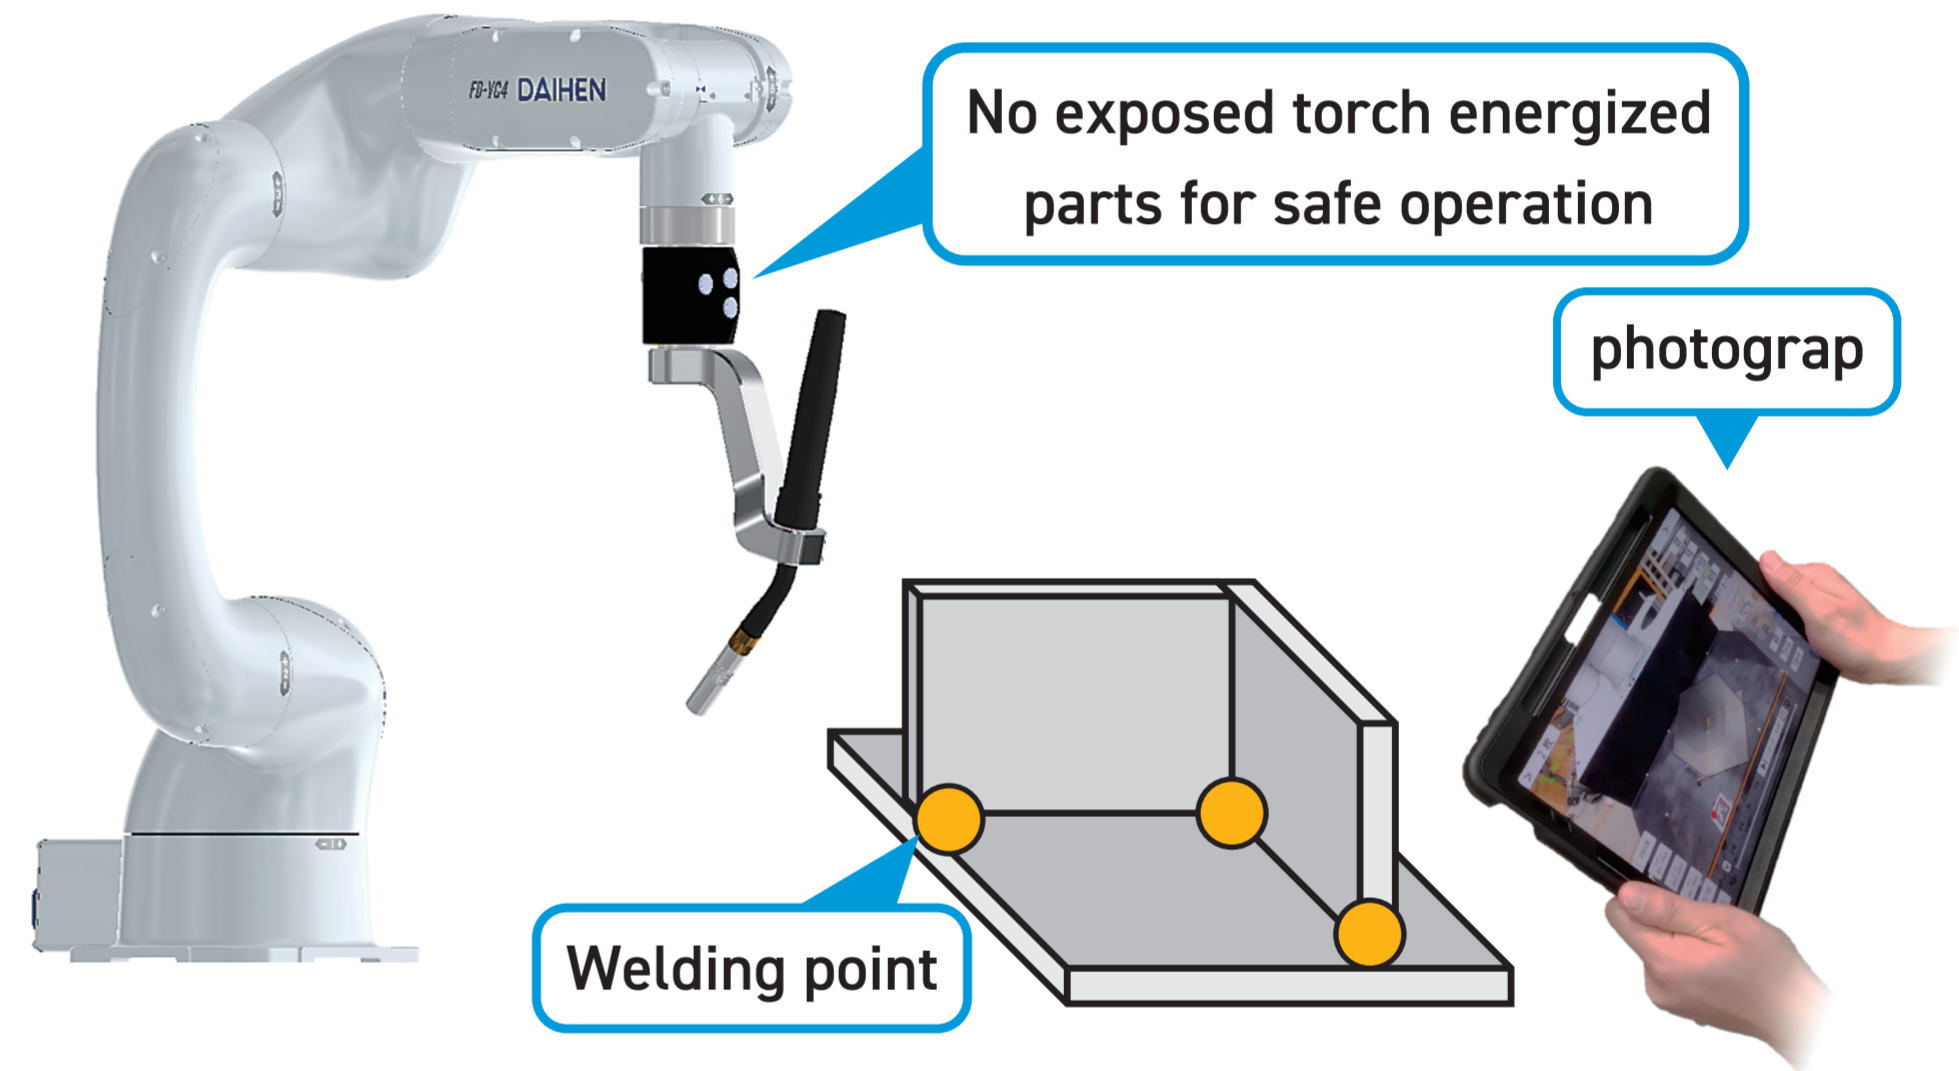

New instruction combining "intuitive operation" and "photography

## Intuitive operation with direct teach

- Intuitive adjustment of torch angle and aiming position
- Weld point teaching with button on torch attachmenta
- No exposed torch energized parts for safe operation

Automatic generation of robot motion

- Automatic program generation from captured images and welding points
- Automatic avoidance to avoid collision with surrounding objects
- Display of welding points and motion trajectory on the image
- Simulation of robot motion

No exposed torch energized parts for safe operation
