

## Synchrofeed-Evolution

### Reduces spatter by up to 99

- High-speed synchronized control of wire feeding and current waveforms
- Elimination of spatter removal process by ultra-low spatter welding

conventional welding

synchro-feed

### Push Arc Process

- Flat bead appearance improves gap margin
- Ultra-low spatter even when welding multiple units simultaneously

conventional

Push Arc

### New Pull Feeder

- Simple and easy connection
- Improved maintenance with automatic cleaning function
