

Ultra-Low Spatter Welding Synchro-Feed II

High-quality welding with no rework required

- 99% reduction in spatter (sparks) ※¹
- Achieves both 20% faster welding speed※² and deep penetration

75% reduction in maintenance workload※²

- Easy cleaning with one-touch opening/closing
- Easy replacement of consumable parts without tools
- Flat structure for easy dust removal

25% reduction in running costs※²

- Reduced relay parts (wire buffers) ※³
- Reduced consumable parts for cost savings

※¹ Compared to conventional welding

※² Comparative reference values with Synchro-feed evolution

※³ When using pack wire
